Cubic transfer, so called  
3-D curved printing, en-  
ables one to print on  
any three dimensional  
surface of any shape. People usually  
perceive the vivid outcome of printing  
as it is in nature. Hence, patterns rep-  
lication wood, leopard, jade, marble  
and etc, will widely ap-  
ply this technique.

With continuous  
investment on  
both equipment and  
facility, Kobo printing technique has  
outranked the other  
printer, making  
the product more  
appealing.
